### PROFILE SUMMARY

### Github account

As a Junior Front-end Developer with one year of experience, I have successfully implemented projects using Reactjs. I specialize in Nextjs and excel at creating responsive designs and delivering real projects.

### TECHNICAL SUMMARY

I have one year of experience implementing projects using Reactjs 18. I am skilled in using various hooks such as useState, useEffect, useForm, and useCallback. I strive to follow best practices and write clean code by breaking down the site into components and custom hooks. I specialize in Nextjs 13.4 and use SSR, SSG, and app routing to make the site SEO-friendly. I have experience with different state management tools such as Redux, Zustand, and the Context API. Additionally, I use framer-motion to create high-quality animations. I have extensive experience in handling requests and responses, as well as creating logic while working with different back-end technologies such as Nodejs and Laravel.

### PROFESSIONAL SKILL

- "I have a strong ability to analyze and solve complex problems."
- "I am skilled at breaking down complex information into manageable parts to find solutions."
- "I have a logical and methodical approach to problem-solving."
- "I am able to think critically and make data-driven decisions."

### TECHNICAL SKILL

HTML	CSS
JAVASCRIPT	REACTJS
NEXTJS	REDUX
TYPESCRIPT	GIT GITHIB
TAILWINDCSS	ZUSTAND
Framer-motion	bootstrap

### PROJECTS

#### company Dashboard

- This is a company dashboard web application built using Next.js 13, Tailwind CSS, and Next-Auth for authentication. The dashboard allows the company to manage and control various aspects of their system.

## Social media (twitter)

- a Twitter clone with React, typescript, Tailwind CSS, Next.JS, zustand, Prisma and MongoDB – Authentication system – Notification system – Image Upload using Base64 strings – Prisma ORM with MongoDB – Responsive Layout – 1 To Many Relations (User – Post) – Many To Many Relations (Post – Comment) – Following functionality – Comments / Replies – Likes functionality

## E-commerce

- A E-commerce Application with paying by Paypal, you can add the product what you in the dashboard ,you can show your history of dealing and every thing is saving in database . I used Nextjs, Javascript, Tailwind CSS, Redux toolkit, NextAuth for authentication, JWT for protecting the data of users and MongoDB for database. . You can easily convert the price in your local currency.

## My portfolio

- My Portfolio I made it with Nextjs, tailwind and framer motion

---
